

Data Summarization

Summarize your data: Use SQL to calculate descriptive statistics for both the film table and the customer table. For numerical columns, this means finding the minimum, maximum, and average values. For non-numerical columns, calculate the mode value.

Table: film

```
SELECT MIN(release_year) AS min_rel_year,
       MAX(release_year) AS max_rel_year,

       MIN(rental_duration) AS min_rental_duration,
       MAX(rental_duration) AS max_rental_duration,
       AVG(rental_duration) AS avg_rental_duration,

       MIN(rental_rate) AS min_rental_rate,
       MAX(rental_rate) AS max_rental_rate,
       AVG(rental_rate) AS avg_rental_rate,

       MIN(length) AS min_length,
       MAX(length) AS max_length,
       AVG(length) AS avg_length,

       MIN(replacement_cost) AS min_replacement_cost,
       MAX(replacement_cost) AS max_replacement_cost,
       AVG(replacement_cost) AS avg_replacement_cost,

       MODE() WITHIN GROUP (ORDER BY language_id)
       AS modal_language_id,

       MODE() WITHIN GROUP (ORDER BY rating)
       AS modal_rating

FROM film
```

min_rel_year	max_rel_year
integer	integer
